HealthGuard

INTRODUCTION

Woofer Care is the perfect app for dog owners who want to keep their furry friends healthy and safe. With GPS tracking, reminders for important dates, and the ability to store photos and health plans, Woofer Care makes it easy to manage all aspects of your dog's care in one place. Download Woofer Care today and give your pup the care they deserve!

SOFTWARE ARCHITECTURE AND METHODOLOGY

This project was developed according to the agile methodology .

Hardware System

WOOFER CARE FUNCTIONS

- **Location**
- **Tracking**
- **Reminder**
- **Image storing**
- **Heath plans**

Map

AIMS

To develop a mobile application with vaccination reminder and pet monitoring system

OBJECTIVES

- To gather information about existing reminder applications and GPS monitoring systems.
- To build a connection with the GPS tracker and the mobile application.
- To gather information about Arduino models and find the relevant model which is useful for my project.
- To create an online cloud system to save vaccinations reports and pet's information.
- Test the GPS collar on cats and dogs.

FUTHER WORK

Making records of routine and a report could be genarated daily of the pets
Add GSM funtion

On Collar

CONCLUSION

In conclusion, Woofer Care is an essential app for dog owners who want to provide the best possible care for their pets. With GPS tracking, reminders, photo storage, and health plans, Woofer Care simplifies pet care management in one easy-to-use app. Whether you're a new pet owner or a seasoned one, Woofer Care is the perfect tool to help you keep your furry friend healthy, happy, and safe. Download Woofer Care today and give your dog the care they deserve.

USED TECHNOLOGY

c++ , tailwind css , VS code , firebase ,Arduino , react native
